

SCOTTSDALE DIVISION

licroser

DESCRIPTION

The 1N4057 thru 1N4085A series of Zero-TC Reference Diodes provides a wide selection of nominal voltages ranging from 12.4 V to 200 V with low temperature coefficients of either 0.005%/C or 0.002%/°C for minimal voltage change with temperature. This is achieved at the specified test currents of 10.0 mA for the lower voltages 12.4 V to 33 V, a specified test current of 7.5 mA for the next higher voltage grouping of 37 V to 100 V, 5.00 mA for 68 V to 100 V, and 2.5 mA for the highest voltage group 105 V to 200 V. These axial-leaded reference diodes are packaged in three different plastic body package configurations progressively increasing in size with the voltage. Microsemi also offers numerous other Zener Reference Diode products in smaller packages for lower voltages in popular JEDEC registrations.

IMPORTANT: For the most current data, consult MICROSEMI's website: http://www.microsemi.com

•

Reference Voltage 12.4V to 200V

- Standard voltage tolerance of +/-5%
- Maximum temperature coefficient selections available of 0.005%/°C and 0.002%/°C
- Options for screening in accordance with MIL-PRF-19500 for JAN, JANTX, JANTXV, and JANS are available by adding MQ, MX, MV, or MSP prefixes respectively to part numbers

FEATURES

MAXIMUM RATINGS

Operating & StorageTemperature: -65°C to +175°C

DC Power Dissipation: Case CC: 1.5W Case DD: 2W

Case EE: 2.5W

NOTE: Starting at 25°C, derate linearly to zero at 150°C Case CC derate at 12 mW/°C

Case DD derate at 16 mW/°C

- Case EE derate at 20 mW/°C
- Solder Temperatures: 260C for 10 s (maximum)

APPLICATIONS / BENEFITS

- Provides minimal voltage change in voltage over a broad temperature range
- For instrumentation and other circuit designs requiring a stable voltage reference
- Flexible axial-lead mounting terminals
- Nonsensitive to ESD per MIL-STD-750 Method 1020

MECHANICAL AND PACKAGING

- CASE: Plastic shell and filled with epoxy around hermetically sealed glass diodes
- TERMINALS: Tin-lead plated and solderable per MIL-STD-750, Method 2026
- MARKING: Part number and cathode band
- POLARITY: Reference diode to be operated with the banded end positive with respect to the opposite end
- WEIGHT: Case CC: 1.17 grams Case DD: 1.42 grams Case EE: 2.86 grams
- See package dimensions on last page
